PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building responsive, high-performance web applications using React.js, Node.js, JavaScript, and MongoDB. Strong understanding of component-based architecture, backend systems, and real-time data flow. Experienced in designing scalable systems, handling continuous data streams, and optimizing performance. Proven ability to build end-to-end applications with focus on system architecture, efficiency, and real-world problem solving.

EDUCATION

- Jaypee University of Information Technology** Himachal Pradesh
• *B.Tech in Computer Science and Engineering (GPA: 7.83/10)* 2022 – 2026
Coursework: Data Structures and Algorithms, Artificial Intelligence, Cloud Computing, Computer Networks
- Kairali School** Ranchi
• *Class 12 (CBSE) – 81.5%* 2022
- Kairali School** Ranchi
• *Class 10 (CBSE) – 92.4%* 2020

EXPERIENCE

- Frontend Developer Intern – CodeAlpha (Remote) June 2025 – July 2025:** Developed responsive web applications using HTML, CSS, JavaScript, and React.js while following modern frontend development practices. Implemented reusable UI components and optimized layouts to improve user experience across desktop and mobile devices. Collaborated remotely on assigned development tasks, debugging issues and delivering features within deadlines.
- Frontend Developer – IEEE JUIT Student Branch 2023 – 2024:** Designed and maintained frontend interfaces for IEEE Student Branch technical events and organizational platforms. Collaborated with cross-functional teams to build responsive and user-friendly web pages using modern frontend technologies.

SKILLS SUMMARY

- Languages:** C++, C, Python, JavaScript, SQL
- Full Stack:** React.js, Node.js, MongoDB, REST APIs, HTML5, CSS3, Tailwind CSS
- Systems:** System Architecture (Basic), Real-time Systems, WebSockets

PROJECTS

- Real-Time Bus Tracking System:** Built a full-stack real-time bus tracking system using React, Node.js, and WebSockets. Designed a scalable client-server architecture for low-latency communication and optimized real-time updates for improved responsiveness.
Tech: Node.js, Socket.io, React.js
- Lane-Aware Trajectory Prediction for Autonomous Vehicles:** Developed a lane-aware computer vision pipeline for autonomous driving using real-time road video streams. Applied image preprocessing, perspective transformation, and lane detection to compute lane curvature and vehicle offset, achieving real-time inference at 20 FPS.
Tech: Python, OpenCV, NumPy, nuScenes
- Portfolio Website:** Designed and developed a personal portfolio using modular React components. Focused on performance optimization, scalability, and clean architecture for reusable UI components.
Tech: React.js, JavaScript

CERTIFICATIONS

- : Machine Learning Foundation Certification – Infosys Springboard
- : Explore Machine Learning Using Python – Infosys Springboard

CORE COMPETENCIES

- Strong problem-solving skills using Data Structures and Algorithms
- Full-stack development with focus on scalable systems
- Real-time system design and performance optimization
- Understanding of system architecture and backend communication
- Ability to learn quickly and work on production-level systems
